

SIMPLIFYING THE OUTPATIENT SERVICE PROCESS FOR YOU.

Stat Specialty Hospital's Governing Board and Leadership Team under the direction of CEO, Alan Gonzalez, are pleased to announce the addition of providing outpatient diagnostic services to our South location, at 1023 Bob Bullock Loop.

STAT Specialty Hospital now offers 24/7/365 Outpatient Services at all our locations. Adopting the same successful concept from our freestanding ERs, completing your medical tests and procedures in a timely manner is our main focus and goal! Time is valuable to all our patients and we understand the importance of making it easier and faster for you. No more having to wait hours upon hours for a test to be completed or acquiring your results.

Outpatient services, like CT scans, x-rays and laboratory testing, can be a time-consuming and frustrating process for most people. We understand that life is busy, so we aim to make this part of your healthcare process as easy as possible for you and your family. There's no calling for hours for an appointment only to be told you can't be seen for a week. "If you live or work close to our South facility, you now have the convenience of receiving imaging (radiology) and laboratory testing close to home," stated Mr. Gonzalez. The only exemption from the current imaging services we provide at our north location would be an MRI; other than that, our south location can provide the same labs, testing & imaging for both adult and pediatric patients.

HOW OUR OUTPATIENT SERVICE WORKS

We ask that your primary care physician simply provide you with an order to drop off in person or send a facsimile via a secured fax system to our South facility (956-608-3010) or if you choose to visit our North facility (956-284-2522). Upon receipt and review of the order, our patient services manager will immediately reach out to the physician if there are any questions. Our team will then quickly contact the private insurance company and begin the pre-authorization process. Once pre-authorization is confirmed, we will immediately reach out to you and inform you of the approval. That's it! Then you come in — after school, after work, on the weekend; whenever it's convenient for YOU.

MORE ON INSURANCE

With the high cost of healthcare, coupled with the rapid growth of high co-pays and high deductible health plans, we understand that patients are shopping to find affordable imaging and laboratory services.

Many private insurance companies vary on the approval of any testing that is deemed non-emergent. At STAT Specialty Hospital, patients may opt to choose a self-pay plan which may come at a lower cost. Affordable self-pay rates can significantly reduce your out-of-pocket costs and eliminate any need to wait for insurance approvals. *(Self-pay pricing will be discussed individually with each patient in person)*
